

New App Provides Quick Access to Member Information Without Balances

Starts With A Simple Name Search

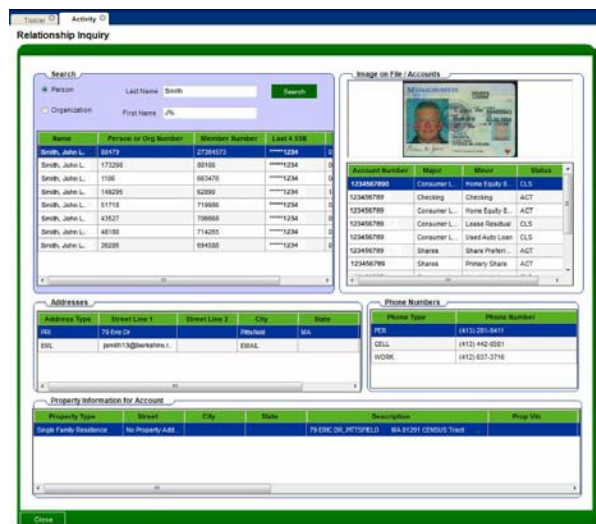

Looking for an easy way to get pertinent member information when access to account balances isn't required or allowed? The Relationship Inquiry DNA app from GTG is the answer. Just do a simple name search and the app quickly provides a list of records that meets search criteria.

All Information on a Single, Easy-to-Access Screen

The Relationship Inquiry DNA app consolidates personal information for any person or organization, in a single, easy-to-access screen. When a record is selected from the list, more detail is displayed, including:

- Addresses, email addresses, and phone numbers.
- Person or Organization Number, Member Number, date of birth, and the last 4 digits of their social security number.
- Driver's license photo, if applicable.
- List of accounts associated with the selected member.
- List of properties associated with the selected loan account.

To learn more or to purchase the Relationship Inquiry DNA app go to:
<http://www.dnaappstore.com/relationship-inquiry.html>

A simple name search reveals details about the member's accounts.

It was great to see you!

We really enjoyed meeting so many of you at:

2017 COCC Client Conference & Partners Expo
June 9th, 2017 at Mohegan Sun in Uncasville, CT

2017 Education & Technology Conference for DNA
June 26-28 at the Chicago Marriott Downtown, Chicago, IL
